

SUBJECT SPECIALISM IN JUNIOR SCHOOLS

Friday 27th and Saturday 28th April 2018

This JAWS is a workshop led sharing of best practice for subject specialism in junior school contexts. It is an opportunity to explore how a curriculum based on subject knowledge and passion can be embedded from EYFS to Year 6.

NLCS Jeju welcomes submissions from interested delegates to present on subject specialism in their own contexts. Presentations on curriculum design from EYFS to Year 6, developing subject knowledge and passion and the introduction of subject specialist teachers in KS1 would be welcomed.

As well as delegates being able to run their own workshops if desired, NLCS Jeju will present on the following:

“The subject specialist model in Year 5 and 6 – reflections on the first year of implementation”

There will also be the opportunity to see subject specialism in action with the culmination of Junior School Science Week.

The cost of this JAWS including 2 lunches and refreshments will be 60,000 KRW. We will be organising optional trips to a local Jeju black pig barbecue restaurant on Friday and the beautiful coast and oreum walk on Saturday.

Cost: 60,000 Korean won per person
